11	Electronics /Electrical Assembly / Sensor Taps	2 Years	1 Years
12	Aerator Control Spouts	1 Years	6 Months
13	Electric Towel Warmer	1 Years	1 Years

CARE & MAINTENANCE - AN OVERVIEW

- To ensure your AMARI care product performs and gives many years of use, please follow our cleaning & care recommendations carefully, as any damages resulting from poor maintenance are not covered under the warranty.
- The ideal cleaning technique is to always blot dry any water from metal surfaces. Allowing water to evaporate on metal will form water deposits. It is important to use a dabbing action to dry metal, not a rubbing action. Cleaning with a damp sponge and buff drying should keep your faucet looking beautiful.
- Most products can be cleaned with warm water, a mild soap and a clean, soft cloth.
- It is not required to use any abrasive cleaning pads, wire wool or micro-fibre cloths to clean the product. Avoid a vigorous cleaning action.
- If using a spray cleaner, apply the cleaning agent onto a soft cloth, never directly spray onto the product as the cleaner may enter gaps and openings and cause damage.
- Residues of toiletries such as liquid soaps, shower gels, shampoos, hair dyes, perfumes, lipstick, after shave and nail varnish can also cause damage, carefully clean these using the methods above.
- Always test the cleaning agent on an inconspicuous area before applying to the whole surface, do not allow the cleaner to remain on the product for an extended period. After cleaning, rinse thoroughly with clean water.
- If limescale has built up on your product do not attempt to chip this off as this could damage the protective lacquer and lead to further damage. Several applications of lemon juice (not a concentrate) or white vinegar, followed by a thorough rinsing with clean water will slowly help to remove it.
